TECHNICAL SKILLS

Programming Languages:
JavaScript, Python, HTML, CSS,
TypeScript

Tools, Databases:
Agile, Atlassian JIRA, Slack,
GitHub, MongoDB, MySQL

Libraries Frameworks:
React, Vite.js, Next.js, Node.js,
Express.js, Tailwindcss

SUMMARY

Pursuing a full-time role that employs the practical experience in web application development and deployment obtained through recent studies. Driven to use technical skills to develop effective solutions in practical scenarios and offer support for technology needs.

EDUCATION

B.S. Computer Science

Graduated: May 2025

California State University, Los Angeles | Los Angeles, CA

GPA: 3.85/4.0

COURSEWORK

Current Trends in Web Designs - CS 4220

Feb 2024 - May 2024

Software Engineering - CS 3337

Feb 2023 - May 2023

EXPERIENCE

Junior Software Developer

Aug 2024 - May 2025

We2Link | Remote

- Contributed to a full-stack React.js and Firebase application designed for users with cognitive impairments, translating accessibility and usability requirements into features that improved memory, password, and task management.
- Collaborated within a sub-team of three software engineering interns, actively participating in code reviews and Agile scrum sessions to evaluate design decisions, improve code quality, and refine development workflows based on peer and mentor feedback all over Zoom.
- Identified data duplication issues in the contact management system and designed a solution to detect and merge duplicate contacts, significantly reducing data redundancy and improving system reliability.

PROJECTS

Dessert Shopping Cart

Sep 2025 - Oct 2025

<https://dessert-shopping-cart.onrender.com/>

- Developed and deployed a cross-platform, mobile-first web application featuring a responsive product listing and shopping cart interface using React.js and Tailwind CSS, ensuring consistent functionality and usability across desktop and mobile devices.
- Built and integrated RESTful APIs within a MERN stack architecture, incorporating Cloudinary for media storage and ensuring reliable data handling between the frontend and backend.
- Implemented centralized cart state management using React Context API, enabling accurate item tracking, price calculations, and seamless state updates across components.
